

Pyramid Geo-Engineering and Construction

Lab ID: LCP- 008

Date: 5 Oct 2020

SUBJECT: Pyramid Geo-Engineering and Construction- Construction Material Testing Services Certification Status Changed to Suspension

By direction of the USACE Transatlantic Division Quality Assurance Manager, this is to advise you that your USACE-Certification to perform Construction Material Testing services, issued on 1 Dec 2019, has been changed to a Suspension Status, effective immediately. You are not certified to perform any material testing services on USACE-sponsored projects and other Clients during this suspension period and the previously issued Certificate is no longer valid, effective today.

This action is taken as a result of the Pyramid Lab Manager's recent departure. The Lab Certification is contingent on several things, including continued employment of the lab manager during the certification period. After he is replaced with a qualified individual, the lab will be eligible to apply for reinstatement.

Following are the Actions required for reinstatement:

1. Prepare the essential package, include update Business License, Master Tests List, and request form and apply for Re-Certification.
2. Submit the Renewal Certification Package with the requirement, effective 1 Feb 2019, and in accordance with the current SOP.
3. Prepare for, coordinate and enable the site visit evaluation for Re-Certification by ABA & USACE LCTs.
